Gastroesophageal Reflux Disease

You have been sent this paperwork because of our understanding that you may have gastroesophageal reflux and surgery is being considered as an option. Please complete the questionnaires as best you can. If you think that you have been sent this material in error, please contact us in advance of your appointment so that we can prepare adequately for your visit.

Which of the following symptoms do you have?

1. Put an X next to each symptom that you have.
2. Rank the three most troublesome to you from 1-3, 1 being most bothersome, 2 being next most bothersome, etc..
3. What percentage of each symptom is relieved by medication at high doses?

Symptom	Place and X next to each symptom you have	Rank your most bothersome symptoms from 1-3, with 1 being most bothersome	% relieved by maximal medical management
Heartburn			
Regurgitation			
Difficulty swallowing			
Chest pain			
Asthma			
Cough			
Hoarseness			
Bloating/belching			
Nausea			
Vomiting			

What is the main reason that you are considering surgery for your condition now?

- I continue to be bothered by heartburn despite medication.
- I continue to be bothered by regurgitation despite medication.
- I am concerned about complications from longterm medication use.
- I am concerned about the risk of cancer.
- I cannot afford the medication used to treat reflux.
- My doctor has recommended that I consider surgery.

How long ago do you first recall having symptoms of reflux?

How long have you taken prescription medication for reflux?

- Less than one year
- 1-3 years
- Greater than 3 years

Does reflux affect your sleep?

- Yes
- No

Have you lost work because of reflux?

- Yes
- No
